Daily Transactions

Presented by:

Swapnil Prabhakar Chavan

Introduction

- **Objective:** Analyze household transactions to find patterns in spending and income.
- **Importance:** Supports budgeting, cost optimization, and financial planning.
- **Scope:** Daily transactions from a household finance dataset.

Dataset Overview

- **CSV File:** Daily Household Transactions.csv
- **Rows:** ~2,461
- **Columns:** Date, Mode, Category, Subcategory, Amount, Income/Expense, Currency
- Mix of income and expense transactions
- Missing values in Subcategory and Note columns

Columns found: ['Date', 'Mode', 'Category', 'Subcategory', 'Note', 'Amount', 'Income/Expense', 'Currency']

Sample rows:

Date	Mode	Category	Subcategory	Note	Amount	Income/Expense	Currency
20/09/2018 12:04:08		Cash	Transportation	Train 2 Place 5 to Place 0	30.0	Expense	INR
20/09/2018 12:03:15	Cash	Food	snacks	Idli medu Vada mix 2 plates	60.0	Expense	INR
19/09/2018	Saving Bank account 1	subscription	Netflix	1 month subscription	199.0	Expense	INR
17/09/2018 23:41:17	Saving Bank account 1	subscription	Mobile Service Provider	Data booster pack	19.0	Expense	INR
16/09/2018 17:15:08	Cash	Festivals	Ganesh Pujan	Ganesh idol	251.0	Expense	INR

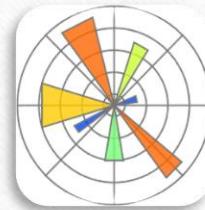

Tools & Libraries

- Tools:

- Python 3 with Jupyter Notebook

- Libraries:

- Pandas – Used for data cleaning & manipulation
- Numpy – Used for numerical calculations
- Matplotlib – Used for plotting and graphs
- Seaborn – Used for advanced data visualization

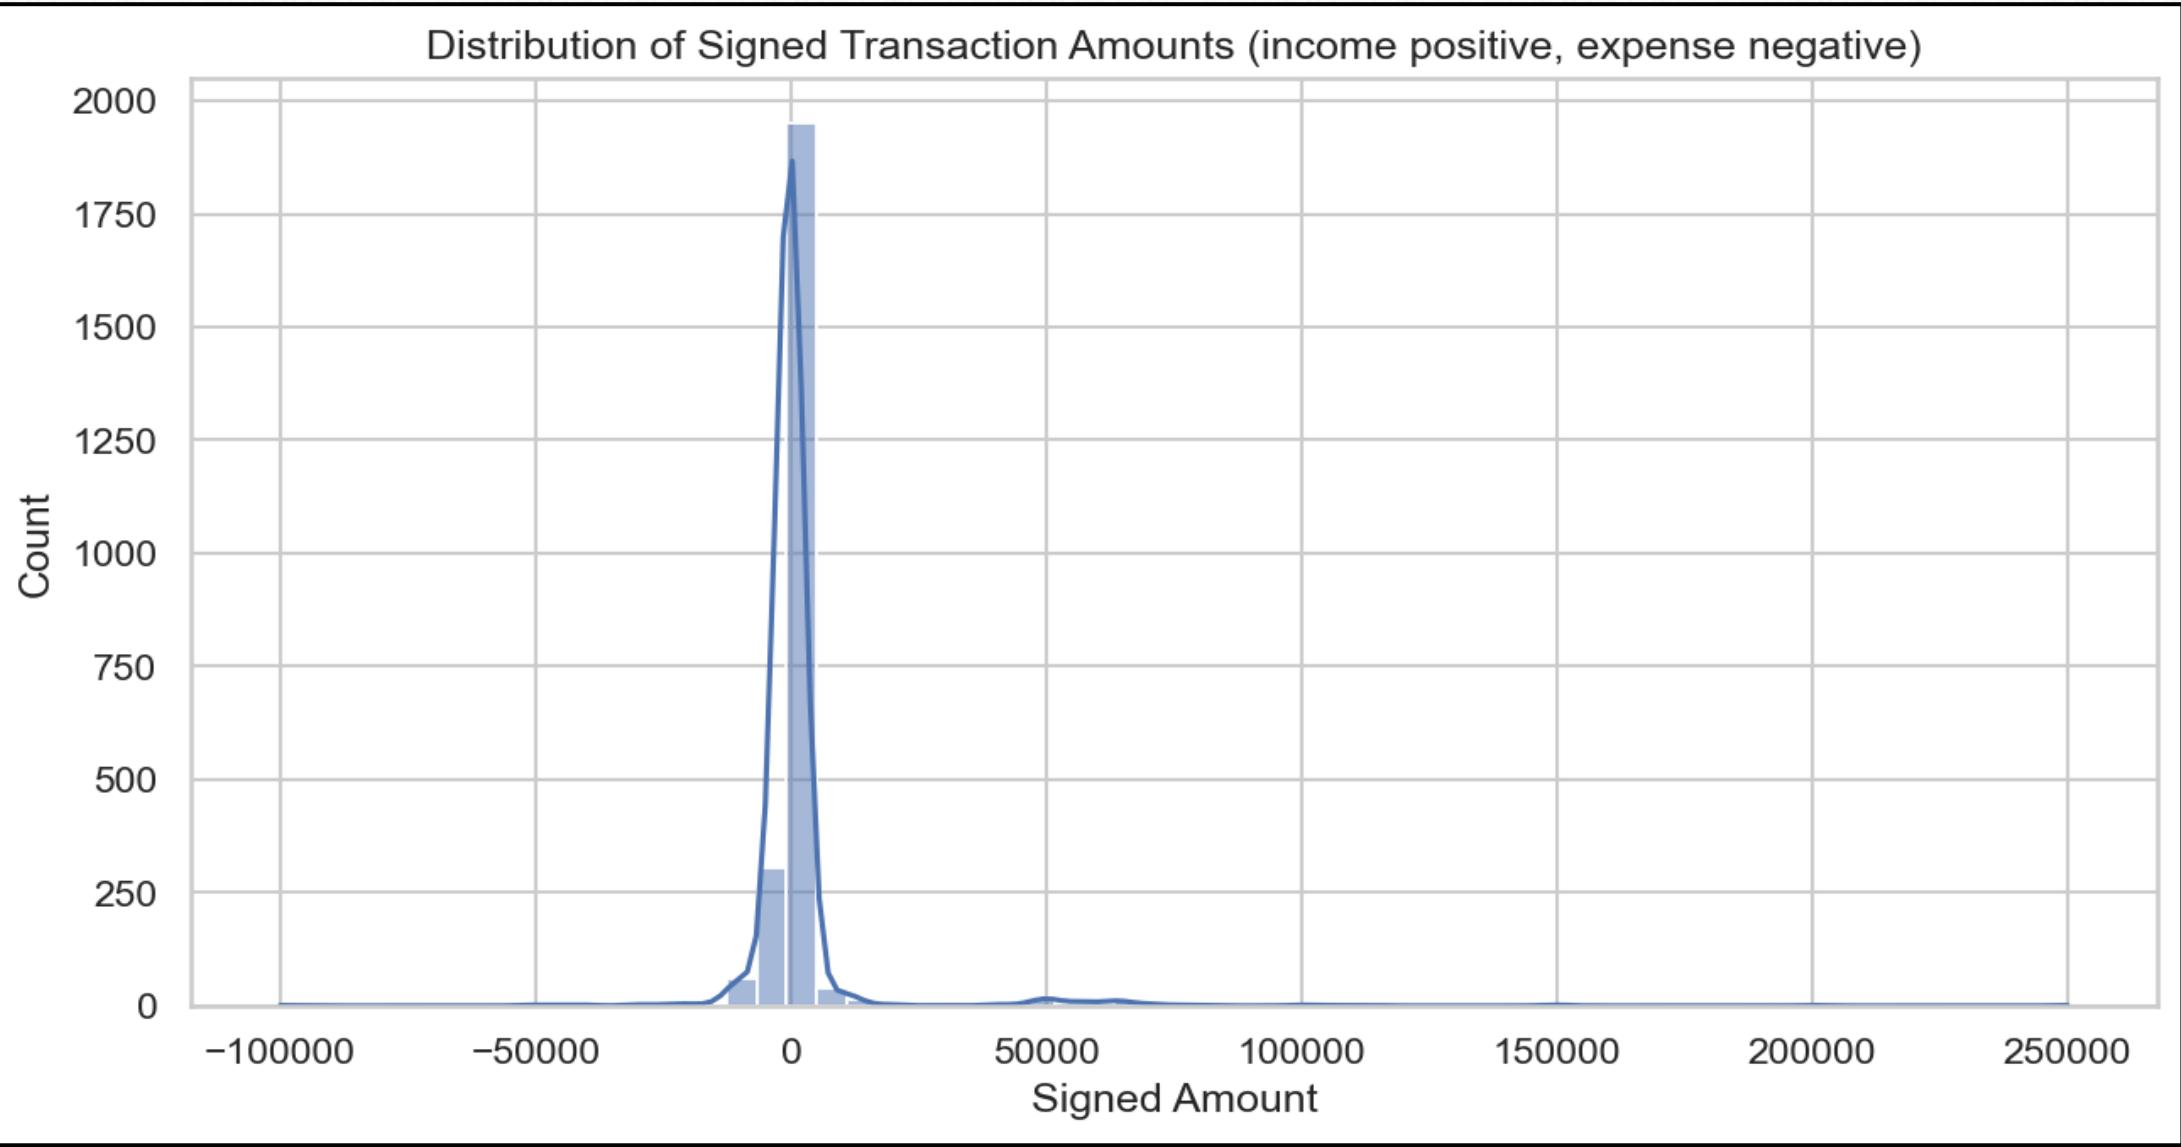

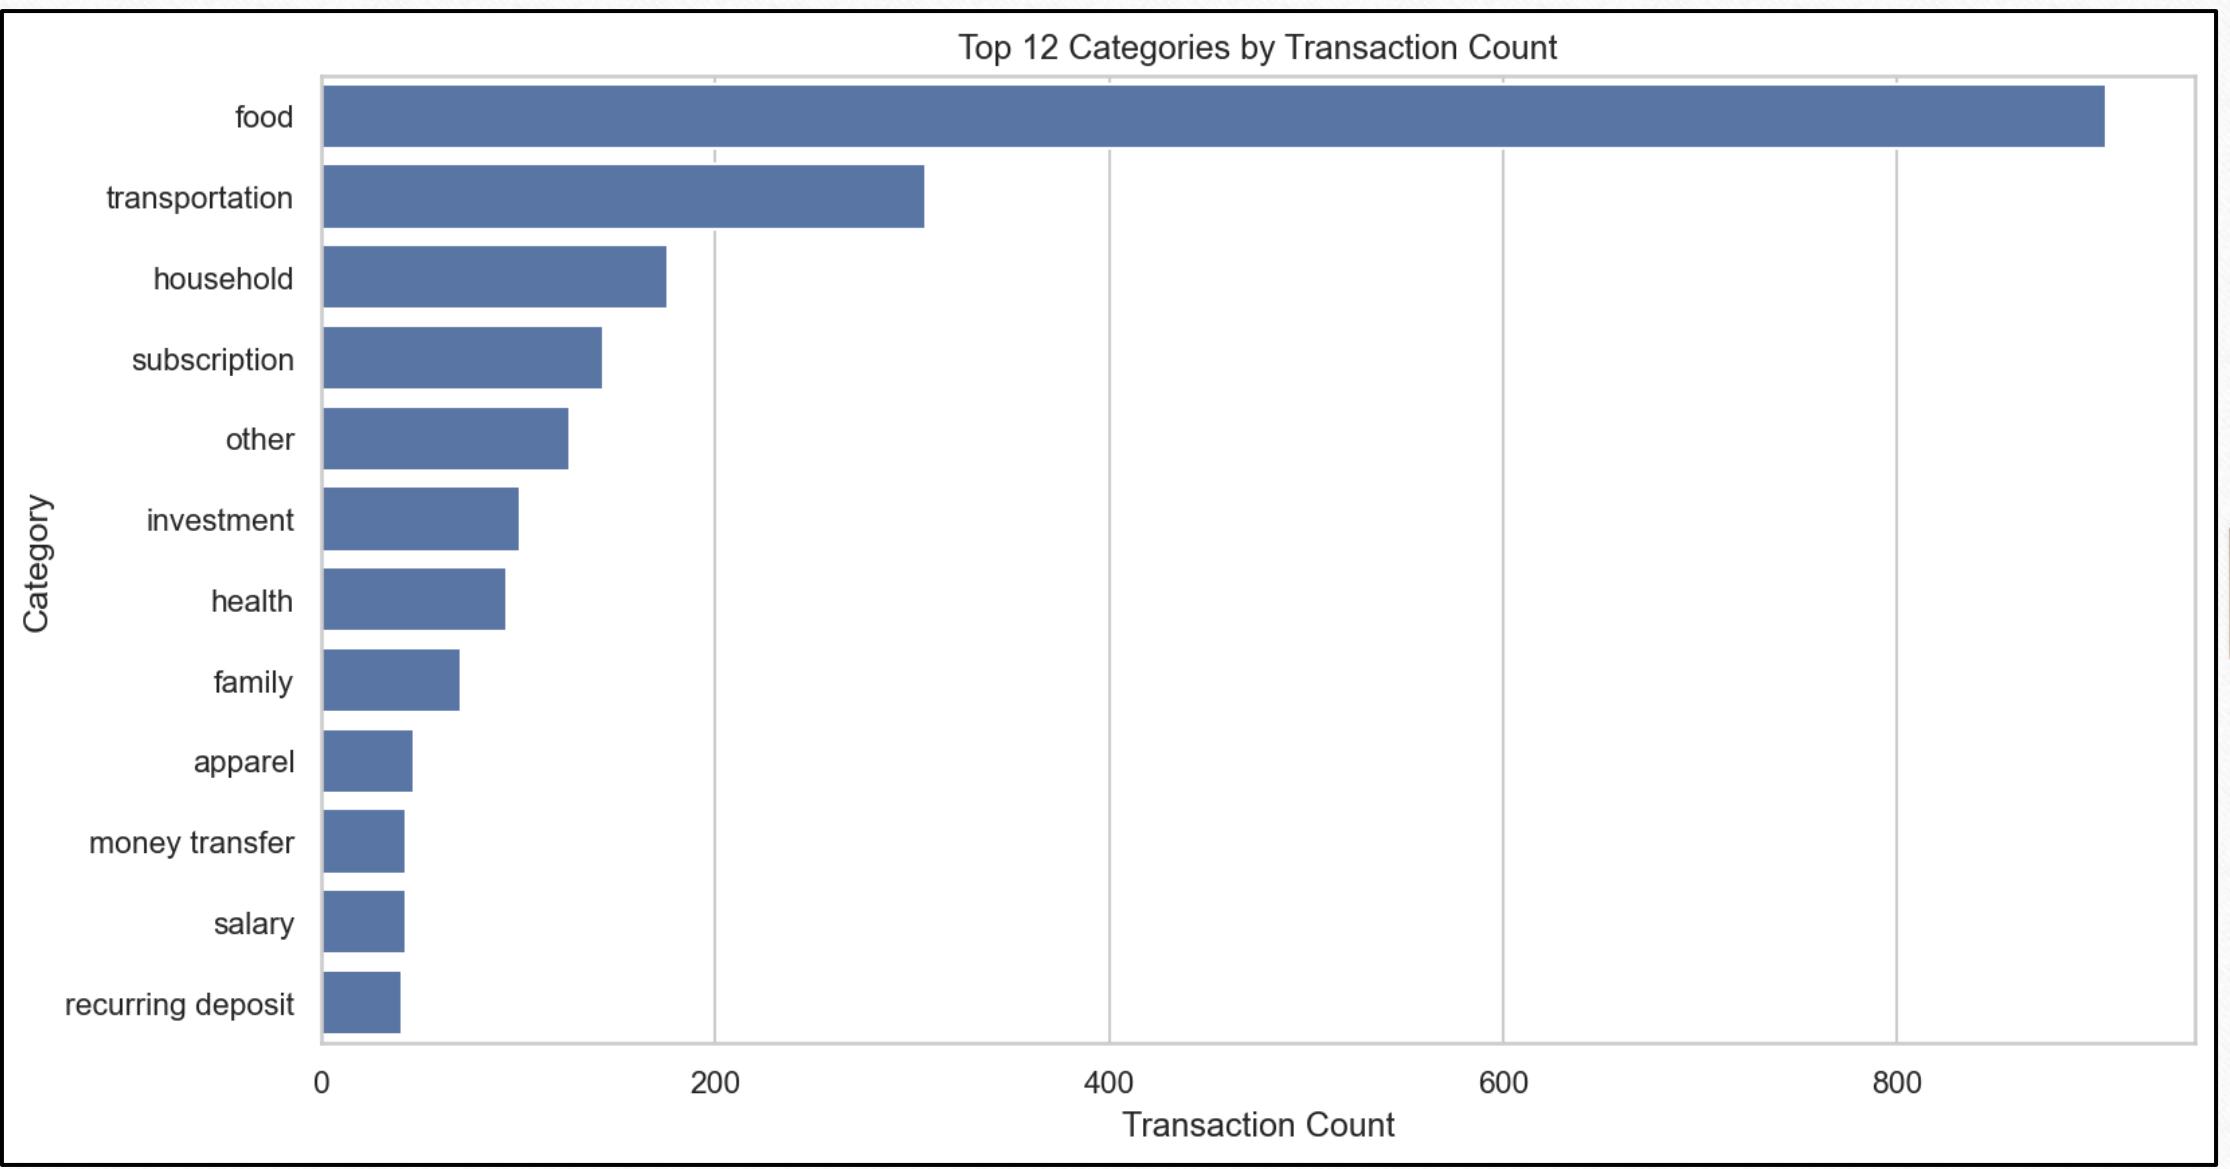

Data Cleaning Steps

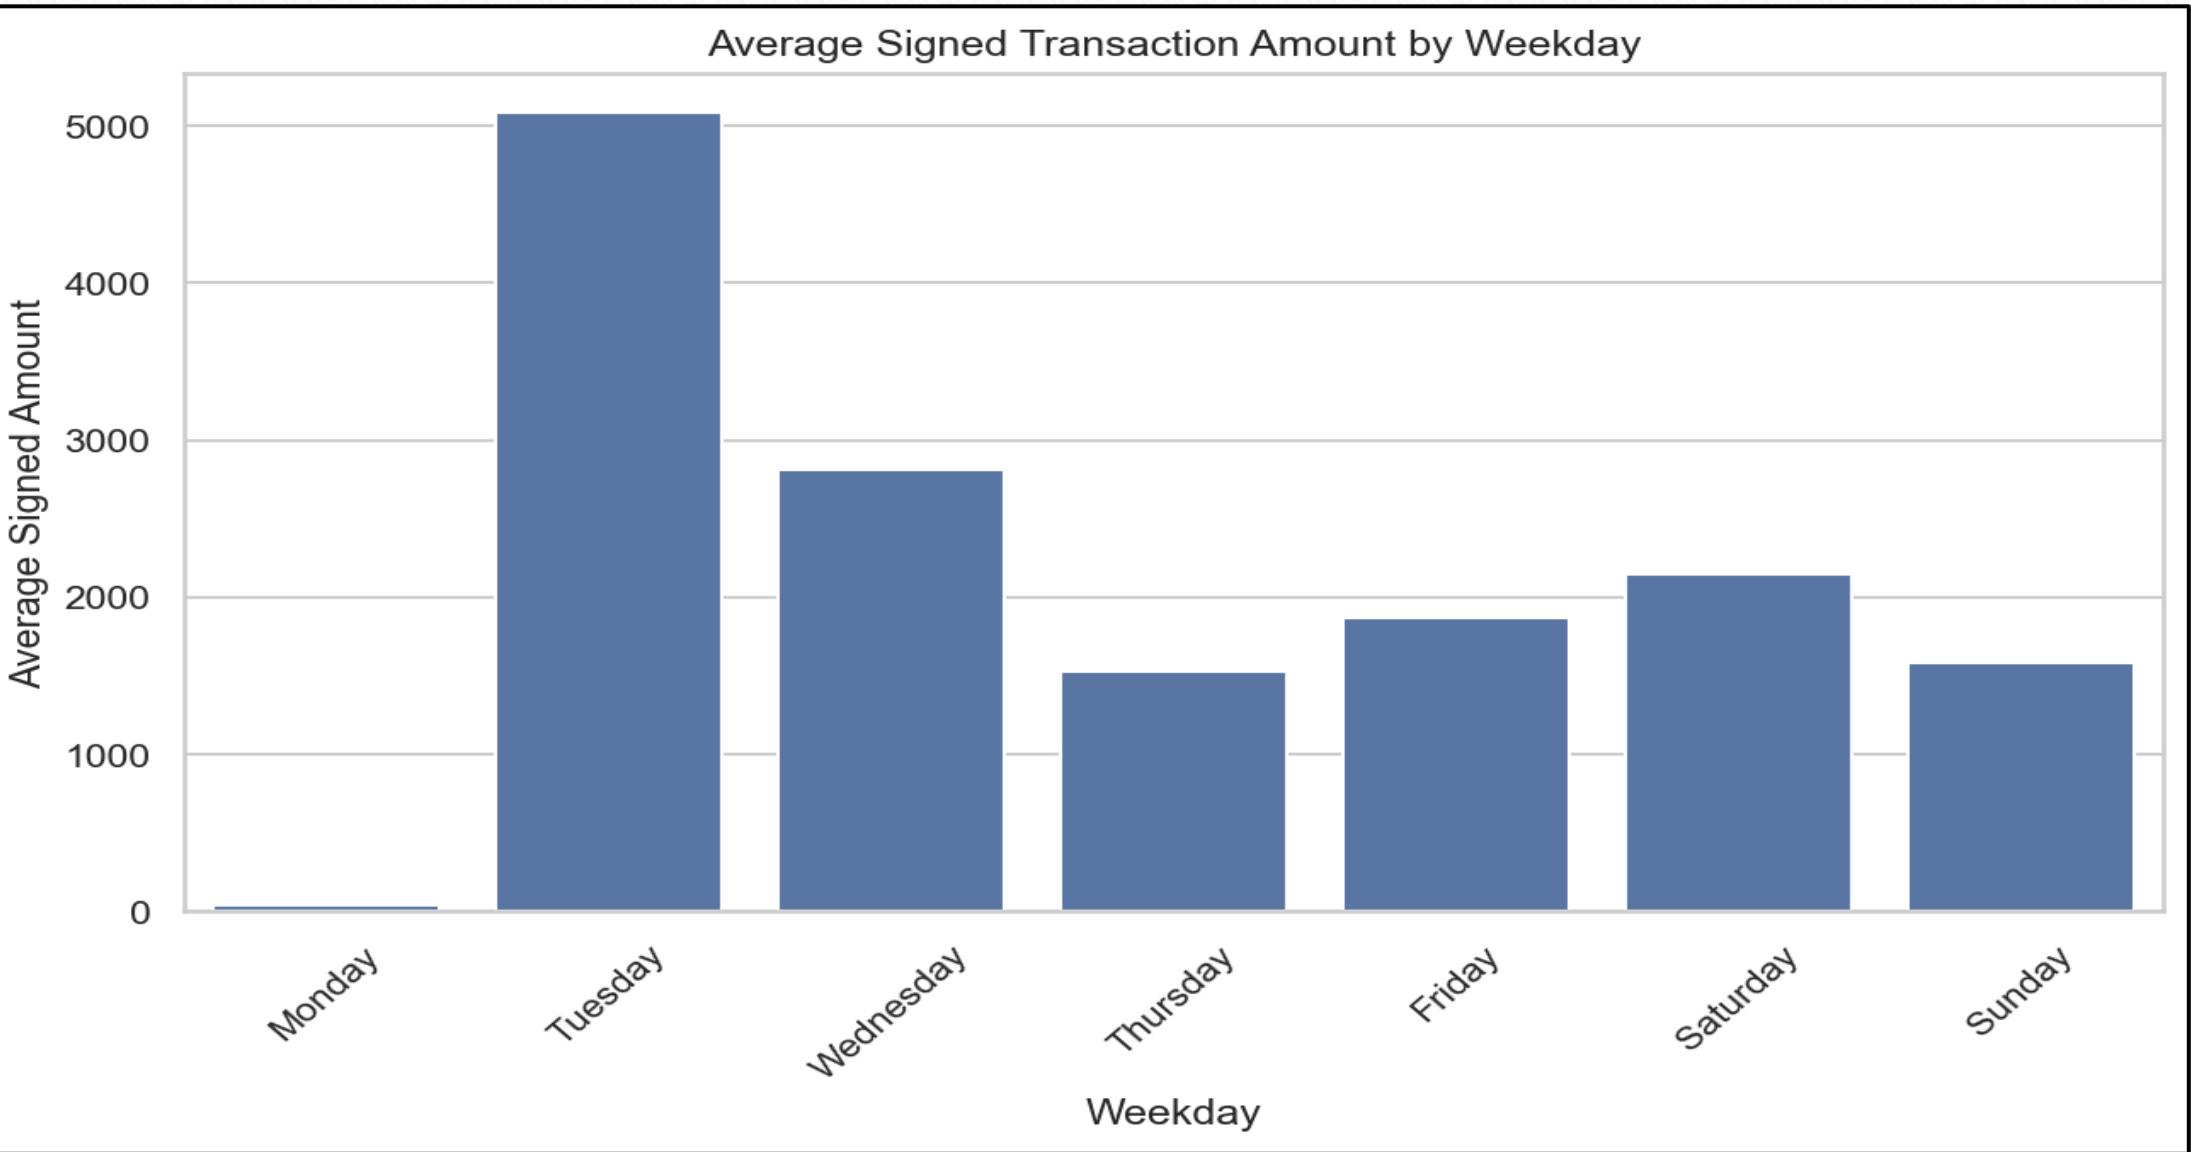

- Removed duplicates
- Handled missing values with fill or drop methods
- Standardized text (lowercase, trimmed spaces)
- Converted Amount to numeric values
- Created new columns: Year, Month, Weekday, Signed Amount

Exploratory Data Analysis (EDA)

- Transaction count by category
- Transaction amount distribution (income positive, expense negative)
- Most used payment modes
- Average transaction size

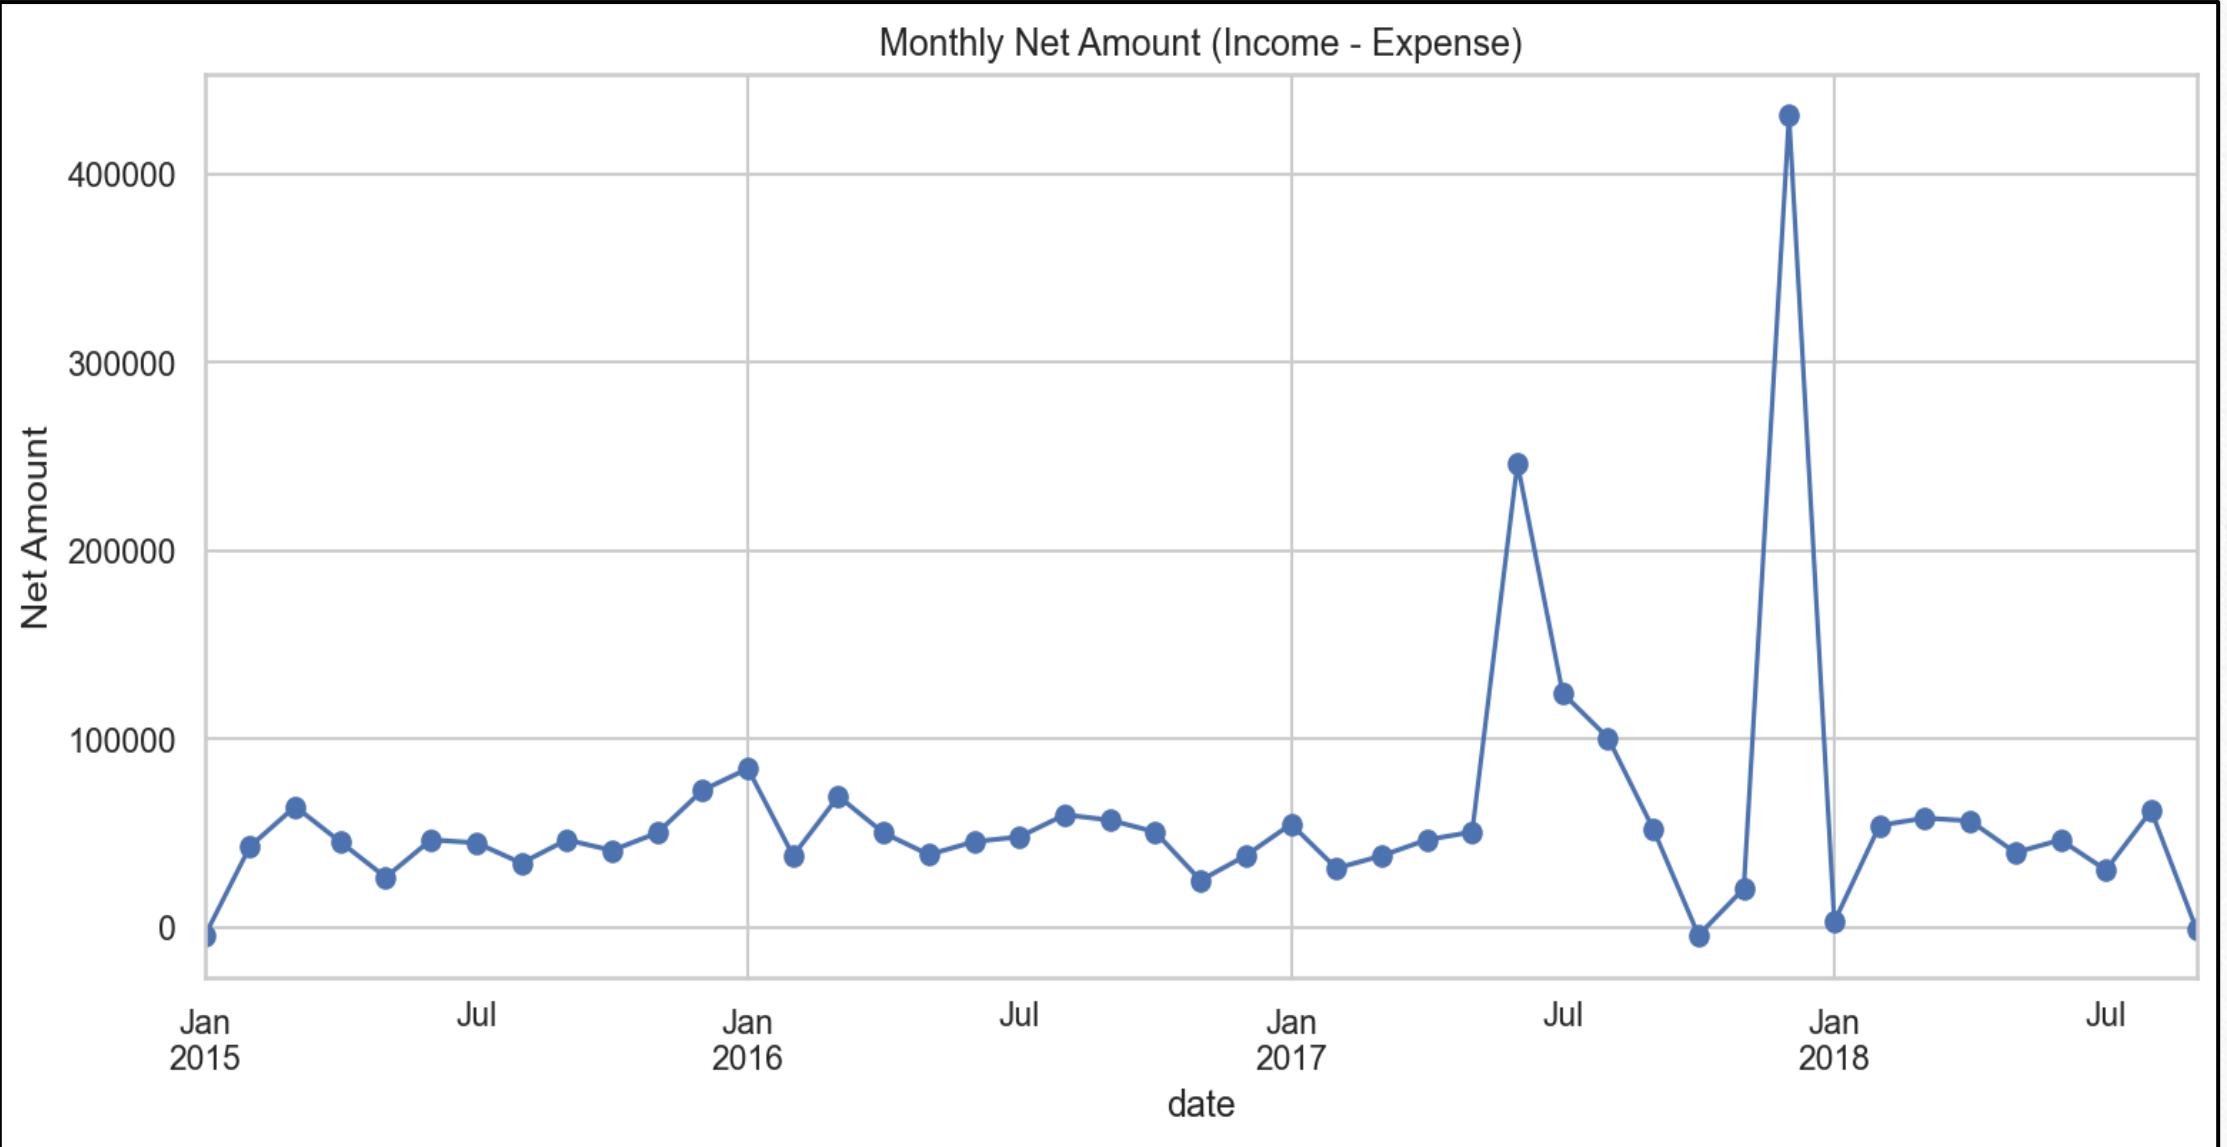

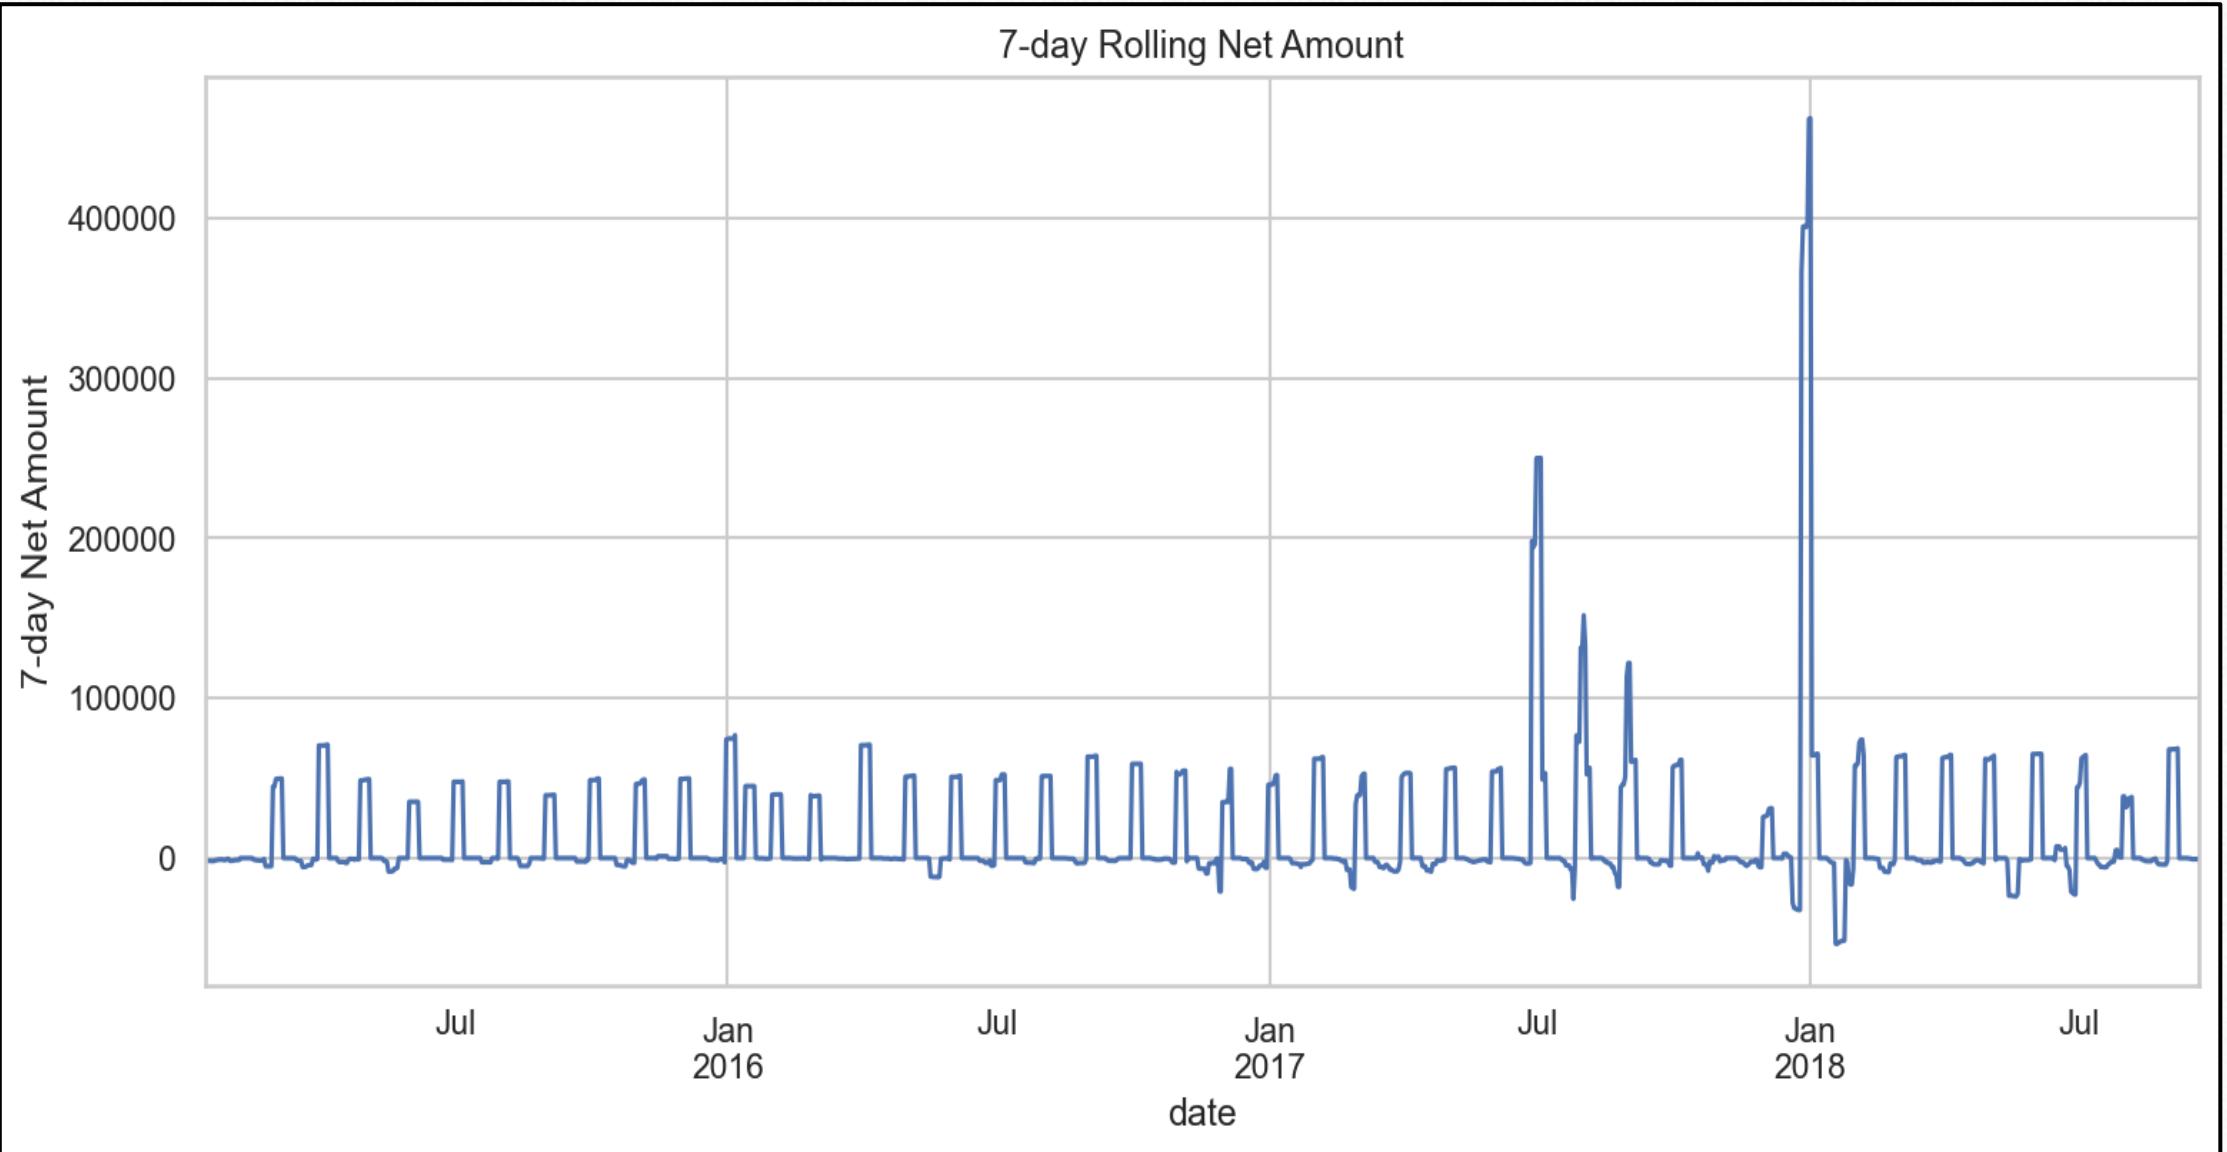

Time Series Trends

- Monthly net balance trend
- Rolling 7-day spending average
- Seasonal peaks in expenses

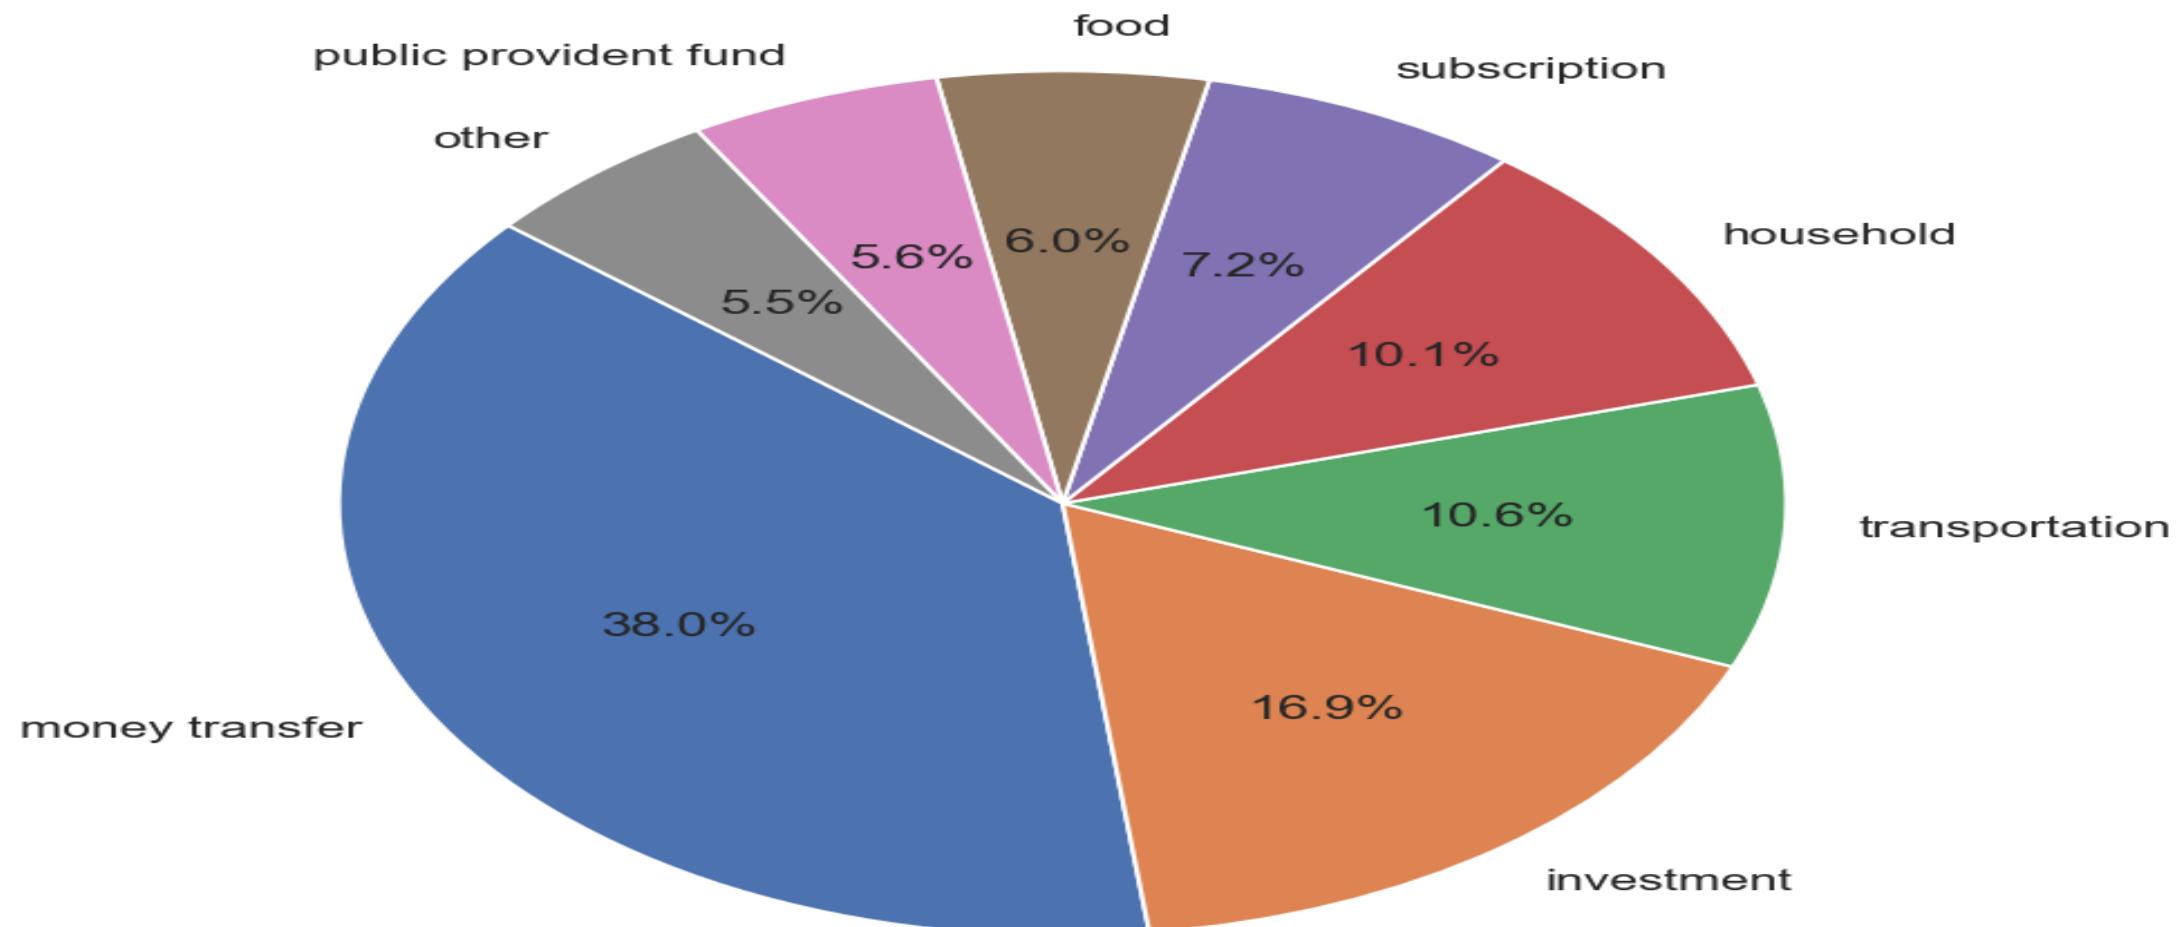

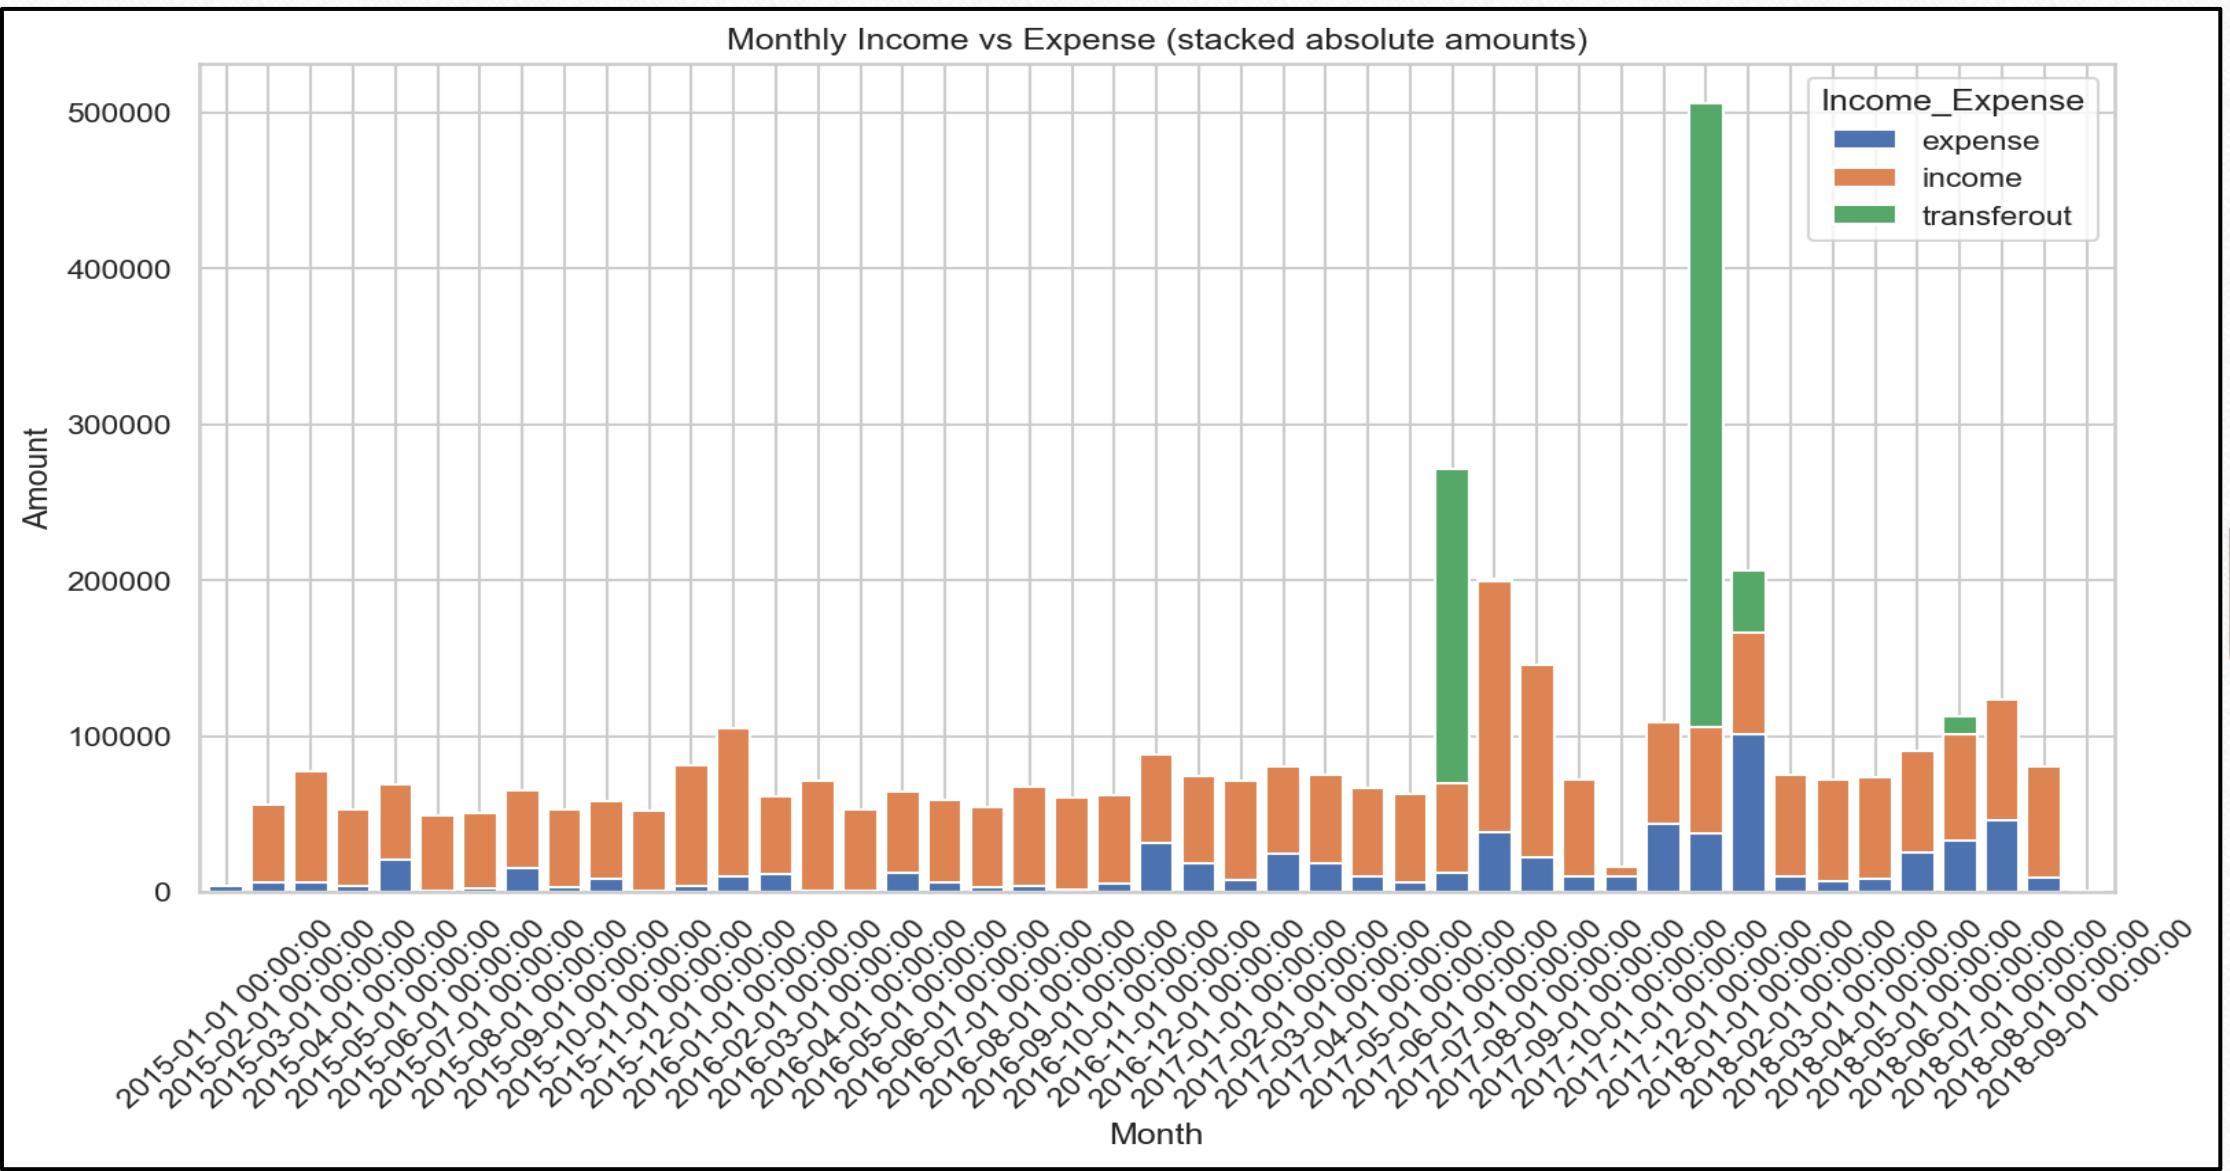

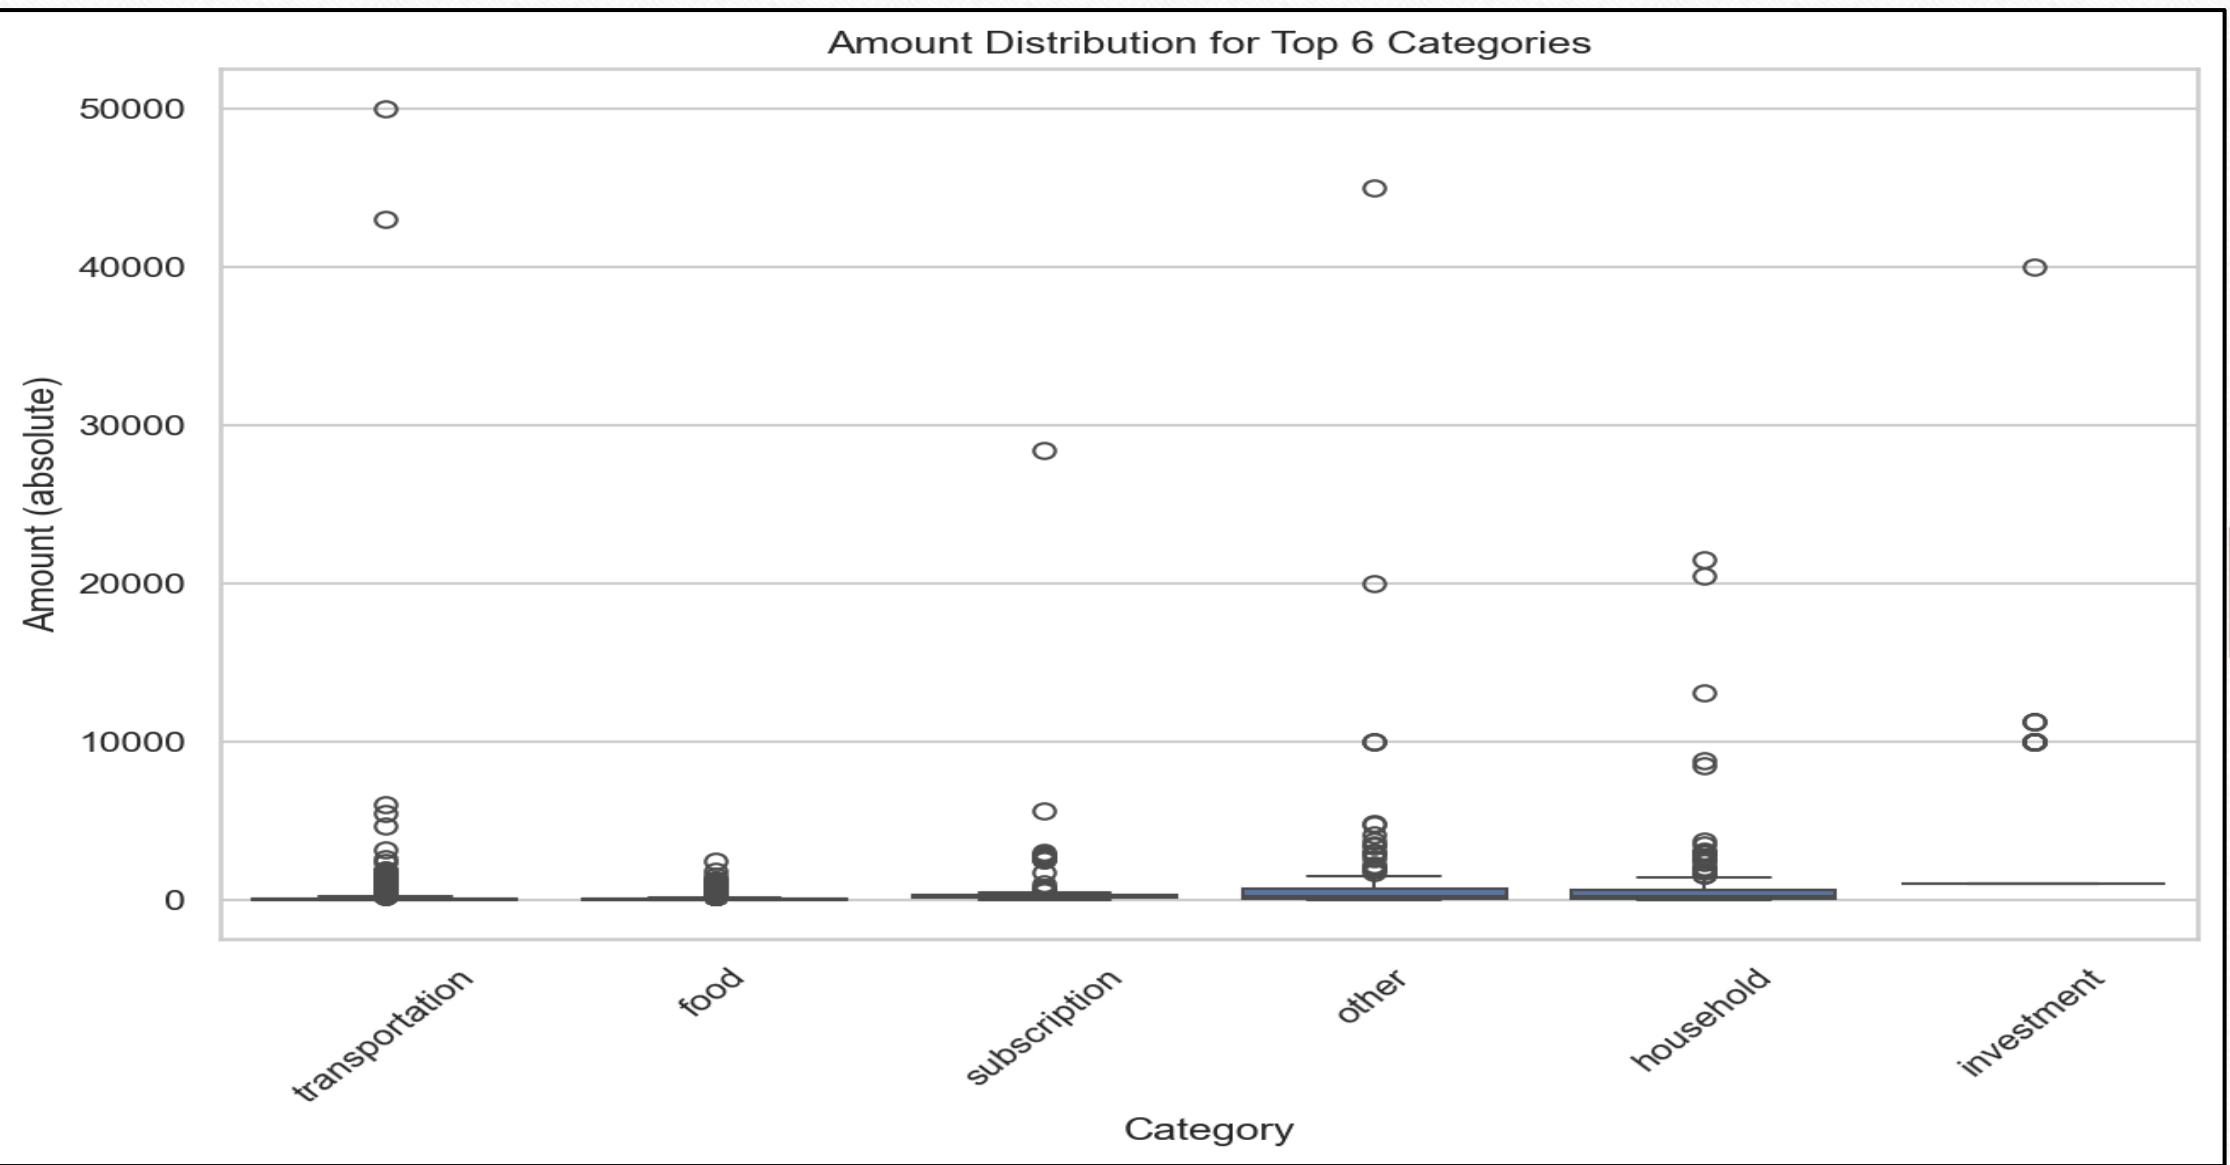

Category & Mode Analysis

- Top expense categories share of spending
- Relationship between payment mode and spending
- Variations in transaction amounts by category

Top 8 Expense Categories by Spend Share

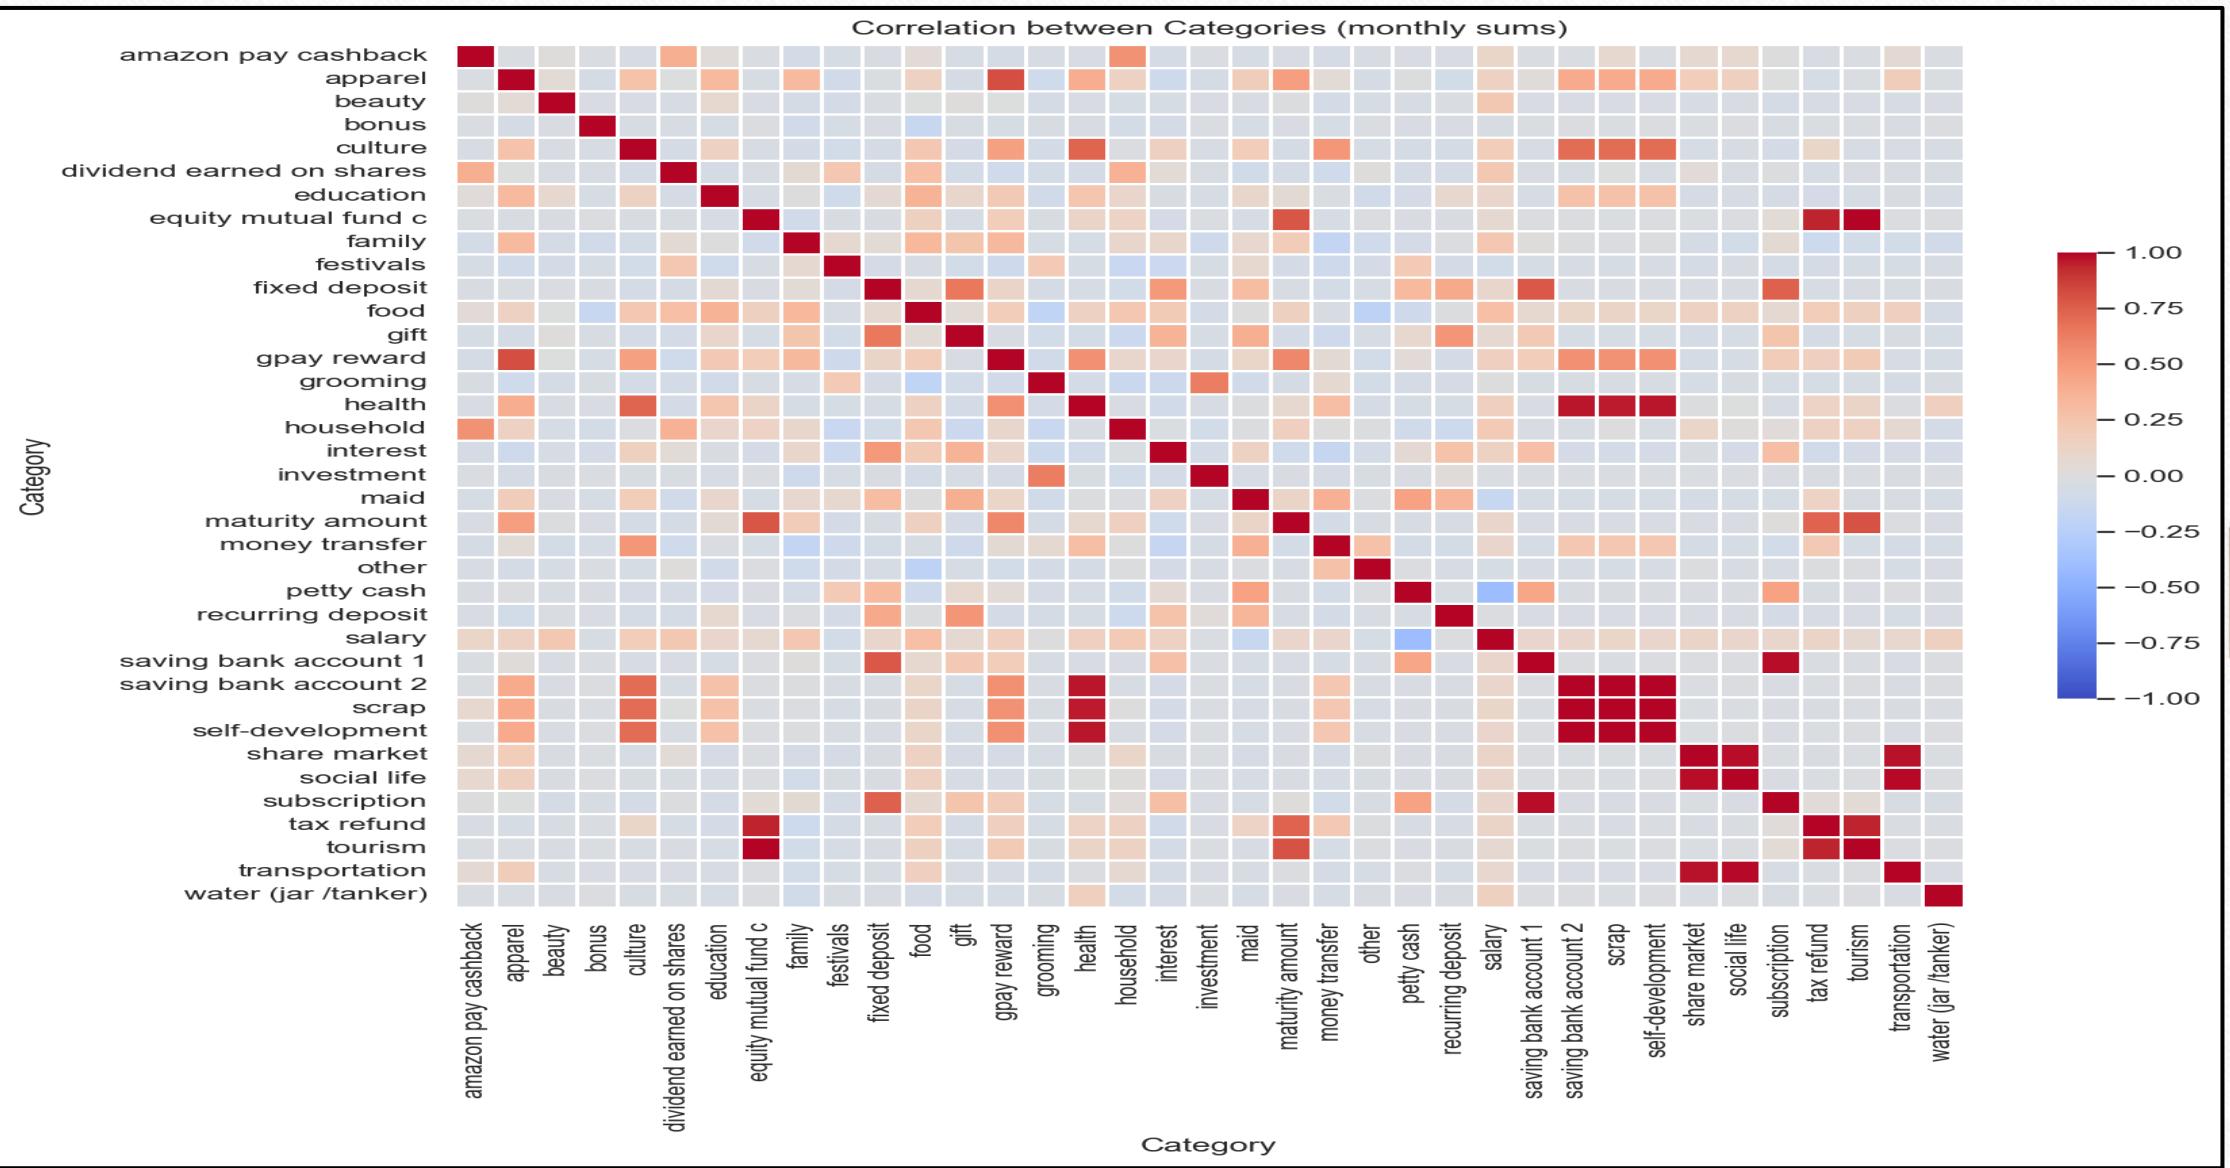

Correlation Analysis

- Correlation between monthly category spends
- Strong positive/negative relationships help spot related expense habits

Conclusion & Recommendations

- **Summary:** Spending dominated by a few categories, seasonal peaks, clear mode preferences
- **Recommendations:**
 - Reduce discretionary spending in top expense categories
 - Allocate budget limits for high-expense months
 - Consider more cost-efficient payment modes

Thank you!
